

**Monthly Air Pollution Control Program Summary Report**  
**Concerns Received or Investigated Between**  
**December 16, 2024 and February 15, 2025**

## **Concerns Received During Report Period**

	Total
Total	177
Asbestos	18
Fugitive Particulate Matter	15
Hazardous Air Pollutant Release	6
Odor	47
Open Burning	54
Other	27
Particulates	10

Number of Referral Notices of Violation (RNOV) Issued: 2

Number of Notices of Violation (NOV) Issued: 3

Number of Letters of Warning (LOW) Issued: 4

Number of Letters of Unsatisfactory Findings (UF) Issued: 9

## **Concerns Investigated During Report Period**

	Total
<b>Total</b>	165
<b>Concerns Received Before Report Period</b>	156
<b>Concerns Received During Report Period</b>	9

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern, therefore the totals listed here may not reflect the total number of concerns received during the reporting period.

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

**Monthly Air Pollution Control Program Detail Report**  
**Concerns Received or Investigated Between**  
**December 16, 2024 and February 15, 2025**

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60026	12/9/2024	12/18/2024	HAMM - Lotawana Quarry	Fugitive Particulate Matter	Lee's Summit	KCRO	DS	Phone Conversation
					/Jackson			
<b>Concerned Party:</b>	Henry Heflin							
<b>Concern Info:</b>	Is concerned about the dust on his car and possible dust in the air from the quarry. He is concerned about breathing it in and says it has been going on for years.							
<b>Conclusions:</b>	No dust issues were observed during the investigation. Will continue to monitor in response to future concerns.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60082	12/12/2024	12/16/2024	Spring Creek Properties LLC	Permitting Open Burning	Lake Ozark /Miller	SWRO	CR	Phone Conversation LOW
<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	The CP is concerned that a nearby development in process may not have the proper burning permits for piles of trees that they just cleared. The plot of land has been cleared of trees, and they started burning them yesterday (12/11). Large amounts of smoke within city limits. The CP is unsure if they are permitted and just wanted to make sure that they are. The CP did not know who was conducting the burns but they think the fire department of Lake Ozark might know.							
<b>Conclusions:</b>	SharePoint #11892							
				Conclusion: A Letter of Warning is being issued for failure to meet the setback distance requirement and maintain constant supervision over burning from a land clearing operation.				
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action

<b>Concerned Party:</b>	mona miller							
<b>Concern Info:</b>	open burning closer than 200 yard from a motel / RV park filling the air with smoke and ash							
<b>Conclusions:</b>	SharePoint #11914			No open burning was occurring at the time of the investigation. No further action is required.				
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60090	12/13/2024	12/18/2024	Wayne Choate	Opacity Odor	Springfield /Greene	SWRO	JW	Communication In Person
<b>Concerned Party:</b>	Allan Kiser							
<b>Concern Info:</b>	See concern 7694. Allan Kiser called on Dec 13, 2024 to report Wayne Choate for releasing excessive smoke and odors from his auto shop at night. Kiser says this is a yearly occurrence during the winter months. Kiser texted a department work cell phone the following: "I literally live next to bass pro shops and a rail road track. I have a pretty high tolerance for crappy neighbors. This is extreme to where it actually disturbs my peace." Kiser also texted the department a video of the smoke wafting out of Choate's shop on the night of December 12, 2024. Kiser stated that he "just wants the owner to be more reasonable" about his burning practices. Kiser is offering to help Choate pay for a new, more efficient furnace.							
<b>Conclusions:</b>	SharePoint #11926			I did not observe any violations during this investigation. No action is required.				
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60096	12/11/2024	12/17/2024	KELPRO	Other	Sikeston /Scott	SERO	HC	Site Visit
<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	Received by email. EPA received 12/04/2024 (Department Received 12/11/2024. Kelpro is emitting harmful contaminants into the air and not taking proper measures to mitigate these emissions. I feel there are also contaminants entering groundwater from this business. Proper PPE is not supplied to worker when working in the toxic environment of metal production.							
<b>Conclusions:</b>	No violations were noted during this investigation.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60097	12/20/2024	12/23/2024	Cape Perry County PWSD #1 South	Suspected Water Line Leak Particulates	Jackson /Cape Girardeau	SERO	DC	Phone Conversation
<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	The concerned party lives on a dead-end on CR411 and has extremely hard water. CP also states that there is a fire-hydrant that leaks for two months if it is operated and wants something done.							
<b>Conclusions:</b>	The district has addressed the leaking hydrant. This concern appears to be over hard water, which is not regulated by the department.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60099	12/23/2024	12/23/2024	Heiman Inc. Hardware Store	Hazardous Air Pollutant Release Pesticides or /Bates	KCRO	SH	Email	
<b>Concerned Party:</b>	Tiffany Fields							
<b>Concern Info:</b>	Farmer spraying anhydrous into air, continuously 7-8 minutes on Friday 12/20/24 at 2:00 P.M. CP called company and spoke with "Rhoda Shouse" and said you can't do that, and company told them to stop. CP called poison control line to get info on symptoms to watch her kids. CP family had to leave house for 3 hours to make sure safe from anhydrous spray/fumes.							
<b>Conclusions:</b>	The release of anhydrous ammonia from a business as identified by the concern party would be the jurisdiction of the EPA, who has delegated authority. In the future, MoDNR will be delegated authority from EPA to the Air Pollution Control Program. Forwarded the concern to EPA.

60101	12/13/2024	12/16/2024	Spring Creek properties LLC	Open Burning Land	Columbia /Miller	SWRO	CR	Phone Conversation
<b>Concerned Party:</b>	Steven Reinkeme							
<b>Concern Info:</b>	Developer is open burning wood from land clearing. Fire escaped and jumped the road threatening houses. Home occupants treated for smoke inhalation. Burning is occurring less than 200 yards from nearest occupied structures. Fire report is available from Fire Chief, Brandon Pharr, Lake Ozark Fire Protection District 573-365-3380. Caller also reports 19 acre of land was cleared and wants to know if permit issued, SWPP filed, and followed.							
<b>Conclusions:</b>	SharePoint #11924							
	Conclusion: A Letter of Warning is being issued for failure to meet the setback distance requirement and maintain constant supervision over burning from a land clearing operation. This is being tracked under concern #11892.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60103	12/12/2024	12/18/2024	Randy Sheldon	Open Burning	Osceola /St. Clair	SWRO	JW	Email
<b>Concerned Party:</b>	Christina Clark							
<b>Concern Info:</b>	Christina Clark, a citizen who recently reported concerns about an asbestos project in Osceola, sent the department another email: "I appreciate your timely response to my inquiry...I have another problem ..recently our neighbor has been clearing a lot and building fence for his cattle...the property was purchased by the neighbor full of the former property owners belongings following his death...my concern is..mobile homes, boats and years of things belonging to former landowner are being burnt...it smells awful is there anything can be done...the man has money to properly dispose of items and instead choosing to burn those things making our air in the neighborhood toxic...law enforcement wont do anything..fire chief works for the man as assistant coroner. Any insight...my family is tired of smelling it...10 NE BUSINESS HIGHWAY 82 Osceola Missouri former residents Vernon Leroy and Peggy Conrad..now owned by county coroner and his son I know we can't be the only ones in the neighborhood having to endure this horrendous smoke coming from the former belongings of the Conards...it seems like the people with all the money in this town have the attitude I have money so I'm going to do whatever I want when I want and do not care for what others are having to deal with due to their actions. Please he has the money to properly dispose of trailers and boats etc..not kill us by the toxicity of what's burning."							
<b>Conclusions:</b>	SharePoint #11909							
	I arrived at the property around 3:00 p.m. I drove up to the west side of the property where I observed 2-3 piles of burn debris, each of which composed no greater than 10 cubic yards. The piles were at least 50 meters from the roadway. Unfortunately, no one was on site so I could not establish contact with the responsible parties and find out whether there was regulated waste in these burn piles. Google Maps satellite imagery showed that the property (at one point) hosted mobile homes and other metallic structures. I did not see any such structures during my investigation. It appeared as if there were metal components stuck in the burn pile, but again, I could not access the property to confirm this supposition. Ultimately I did not find evidence of illegal open burning. I left the region around 3:12 p.m.							
	On December 23, 2024 I managed to find the contact information for the property owner. I reached out to Randy Sheldon, the county coroner, and inquired about his recent acquisition of the property. Sheldon stated that he "had some guys hauling stuff off" because "the previous property owner left things like a mess." Sheldon would not explicitly state whether any of the former structures on the property were demolished and, if so, where the waste ended up. However, Sheldon did say that he had plans on hauling off the burn waste as soon as possible. I informed Sheldon about the solid waste and open burning regulations as applicable. I thanked Sheldon for his time and ended the phone call at 3:53 p.m.							
	I did not observe any violations during this investigation. No action is required.

60108	12/12/2024	12/16/2024	Spring Creek Properties LLC	Open Burning	Lake Ozark /Miller	SWRO	CR	Phone Conversation
<b>Concerned Party:</b>	Steve Reinkemeyer							
<b>Concern Info:</b>								Large fire started yesterday 12/11 and is still smoking. Roughly 30 acres. Fire department was called.
<b>Conclusions:</b>	SharePoint #11907							Conclusion: A Letter of Warning is being issued for failure to meet the setback distance requirement and maintain constant supervision over burning from a land clearing operation. This is being tracked under concern #11892.

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60117	12/17/2024	12/26/2024	Gabriel Trumbly and Sophia Polzoni	Open Burning /Taney		SWRO	BD	Site Visit
<b>Concerned Party:</b>	Christina Bailey							
<b>Concern Info:</b>	Caller wanted to report that the neighbors to the left of her have been burning unknown materials at night that are creating large explosions that can be felt from her house and several houses down. The caller has reported that they are sick with bloody noses, massive headaches, and poor health that has been noted by a doctor. The caller informed me that she would fax the report to our office to substantiate the claims. Caller states that when they call the fire department and local sheriff, the fires are always put out before a responder can visit.							
<b>Conclusions:</b>	SharePoint #11945 A new concern will be written up for the solid waste unit to follow up with due to the volume of waste found on site during the investigation.

60133	12/17/2024	12/19/2024	Owen Sparks and Melissa Estes	Open Burning Scrap Tire	Shelbina /Monroe	NERO	BH	Report UF
<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	Via email, "Mellissa Estes married to Owen Sparks. Mellissa has been burning tires in lots of places around the farm address 30373 Monroe road 239 Shelbina Missouri She is paying someone to do this and doing it herself. There is fresh burn piles around the barns with tire wires in big piles. In each spot. Look behind the south barn by grain bins. "							
<b>Conclusions:</b>	12/19/2024(On-site visit)No one was at the property so I was not able to access the property. From the road, I was not able to observe any tire dumps or open burning. I will write a contact NERO letter.							

12/30/24 An environmental concern response required (contact) letter was sent to Owen Sparks.

1/22/25 Owen received the contact letter and called on the phone. I explained to Owen that we had received an environmental concern regarding tire burning on the property. Owen admitted to burning 6 tires in a pile with some brush. I explained to Owen that he cannot burn tires, and he would need to properly dispose of the tire remains and provided proof of proper disposal. Owen explained he would put the remains in his trash and send the department a copy of the receipt.

60134	12/26/2024	12/26/2024	Bay & Bay Transportation	Other	Raytown /Jackson	KCRO	MC	Referred to Other Agency
<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	Via webform - Submitted at 12:20 pm Thursday, December 26, 2024 - Date of Incident or First Noticed 12/24/2024: This is the second complaint, although this is an ongoing problem since this summer, I've logged against this company who continues to use 62nd Street like it's a truck stop. I like how the police can respond to a parked car outside in the neighborhood, but nobody can do anything about a bunch of dummies using a public residential street like a flying j truck stop? I'm sick & tired of hearing this truck idle constantly weekend after weekend.... More importantly all Christmas holiday now. Like I've said in previous complaints not only is it a pollution issue it's an environmental noise issue too. When is it enough? Either these people are fronts for drug trafficking or at the very least have zero respect for the community or residents of Raytown. This is a refrigerated reefer trailer hooked to a rig that's been idling for 3 days in front of this property now...from midnight on last night, off and on all day today.  Like I said when is it enough for someone to take action against this company & at the very least this incompetent driver? Please I'm asking for some assistance in the matter as soon as possible.							
<b>Conclusions:</b>	Discussed this new concern and the previous concern with Raytown Codes Enforcement. Enforcement officer has not seen the truck, but he has sent letters to the homeowners at the reported addresses. Enforcement officer also stated that if the truck is parked in the street, then it would be a police issue. He has notified Raytown Police of the issue.

60137	12/24/2024	1/10/2025	C&L Grease Land Application	Odor Land Application Permitting	/Jasper	SWRO	DH	Other
<b>Concerned Party:</b>	Ryan Evitts							
<b>Concern Info:</b>	Quotes from emails received by our department: 12/17/2024- "The stench in Webb City, MO as a result of nearby dumming operations (C&L Grease?) is BEYOND ACCEPTABLE. I contacted our local city government who claims there is nothing they can do, and now your agency this morning to report the situation. Should you reside in this area, you would also be concerned with the obnoxious smells which have been hovering over our community for the past 12-15 hours. This matter has gone on for several months now. This should not be allowed; please report on steps to resolve this matter. Please advise if there are additional regulatory agencies which should be contacted to resolve."							
			12/23/2024- "December 23, 2024 I was greeted by a noxious odor while traveling eastbound along State Highway 171 at approximately 0820. The smell was initially noticed at 37° 9'54.79"N, 94°24'1.67"W, windows up an AC on. I took a similar route back an hour later, noticing the smell beginning at 37°10'0.29"N, 94°23'51.18"W, and ending 37° 9'7.68"N, 94°25'29.77"W. This is approximately 1.5 miles north of an alleged land application site. Under the FOIA please release a copy of the permitted location for C&L Grease and Wastewater Services, LLC including all pages of the approved permit application including exhibits. I have been told the permit is agriculture in nature; however, I suspect the operations to be from a commercial entity who collects / allows disposal of industrial related waste. Your agency simply cannot allow this matter to persist."					
<b>Conclusions:</b>	No action taken; resources provided for sunshine law requests.

60139	12/17/2024	12/17/2024	Duane Stevens	Open Burning	Bethany /Harrison	NERO	SB	Site Visit
<b>Concerned Party:</b>	Jacob Denum							
<b>Concern Info:</b>	The caller reports that multiple parties have been reporting that the smoke from Duane Stevens' sawdust burning is causing low visibility on Highway 69. The smoke is bad in the low elevation on the highway and seems to be worse on low pressure mornings or evenings when the smoke hangs low. It was reported to be bad on Monday morning when driving from the south and headed north. There was also some fog that morning.							
<b>Conclusions:</b>	No violation at the time of investigation. Warned RP that not extinguishing the sawdust fire, which started by spontaneous combustion, could lead to a vehicle accident and a violation of the open burning rule and was also a potential liability to him.							
<b>Concern No.</b>	<b>Date Received</b>	<b>Investigation Date</b>	<b>Suspected Source Owner/Operator</b>	<b>Concern Type</b>	<b>City/County</b>	<b>Region</b>	<b>Inspector Initials</b>	<b>Final Action</b>
60141	12/27/2024	12/30/2025	Sophia Polzoni	Open Dumps Open Burning	Protem /Taney	SWRO	MK	Phone Conversation
<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	Caller states that they live on a property owned by Classic Country Land LLC, and their new neighbor has brought a large amount of solid waste on site and is potentially burning regulated items. The responsible party also lives out of a bus that is on site with no running water or waste disposal. The caller was advised to contact the Taney County Health Department as well.							
<b>Conclusions:</b>	SharePoint #12006 No trash of any type was observed leaving the property. Polzoni was advised to keep the trash contained and educated on the rules and regulations that could be enforced.

60147	12/30/2024	1/2/2025	Central Disposal Service	Asbestos Open Dumps:	St. Joseph /Buchanan	KCRO	MC	
<b>Concerned Party:</b>	Stephen Blair							
<b>Concern Info:</b>	Asbestos is being removed from the side of houses and buildings. The CP says the asbestos is being put into dumpsters and is being hauled away by Central Disposal Service (CDS) trash service. The trash service is nearby the intersection of King Hill Avenue and Lake Avenue. There is a section along the roadway where asbestos is being buried along with trash and covered with dirt. They are burying material along the Stockyards Expressway near the water treatment plant. The CP has reached out to news agencies about this matter.							
<b>Conclusions:</b>	Only clean fill and vegetation was observed at Central Disposal Service's location near King Hill and Lake Avenues. Regulated solid waste appears to be deposited at permitted landfills. No evidence was found during his investigation of illegal disposal.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
60159	12/30/2024	1/3/2025	32nd Street Odor Route	Odor	/Jasper	SWRO	BD	Memo
<b>Concerned Party:</b>	Ardonia Williams							
<b>Concern Info:</b>								
				Caller states that she experienced a very strong sewage odor at her house yesterday (12/29) and that it persisted and then worsened throughout the night. Caller was unsure of the wind direction, but weather conditions reported winds from the west/southwest for the majority of 12/29 in Joplin MO. I informed caller that since the source of concern was unknown, that we would investigate all nearby industries for any odor concerns.				
<b>Conclusions:</b>	SharePoint #12011							
				No violations of 10 CSR 10-6.165 Restriction of Emission of Odors was detected from any of the facilities within the 32nd St vicinity.

<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	Anonymous caller states that a construction company is burning trees in two separate brush piles, but one of the piles is emitting black smoke because it has waste inside it.							
<b>Conclusions:</b>	SharePoint #12018							
<p>I arrived to the property at 10:46 a.m. I did not see any smoke plumes as I was approaching the property. I entered the Donco 3 Construction building and I met with a receptionist. I introduced myself along with my credentials and I explained the reason for my visit. The receptionist then handed me Aaron York's business card. She also found an employee that could escort me around the property to look at previous burn piles. I met with Treavor Bussard of the Southwest Regional Office at 10:55 a.m. then we walked towards the northwest corner of the property at which there were two burn piles. These burn piles were composed entirely of vegetative waste. Each burn pile was no more than 15 cubic yards and at least 200 yards away from nearby residences. Bussard explained that the Donco 3 Construction facility was new and that they were still clearing trees north of the building. We walked back to the entrance of the building and we bid farewell. I thanked Treavor for his time and I ended the investigation at 11:02 a.m.</p> <p>I did not observe any violations during this investigation. No action is required.</p>

60189	12/23/2024	12/31/2024	Janet Blakemore	Open Burning Scrap Tire	Boonville /Cooper	NERO	DB	Letter
<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>			On December 23, 2024, the Northeast Regional Office received a concern stating that somebody is burning a pile of scrap tires at 17978 Jackson Road, Boonville, MO. The scrap tires are just being burned just north of the pond near the center of the property. Reportedly, the scrap tire pile being burned is a large pile containing approximately 10 scrap tires. The caller stated that they did not believe that the residents are the ones burning the scrap tires.					
<b>Conclusions:</b>			While tires had been burned in brush piles, the majority of tires appear to be separated out into piles separate from the brush piles, apparently without intent to dispose by burning. Providing information on proper disposal of tires and information on the open burning rule.

<b>Concerned Party:</b>	Chris Henkle							
<b>Concern Info:</b>			Caller reports there was an odor like processing waste (similar to dog food, or protein processing) on Saturday, January 4. Caller noted the smell from 913 West 13th Street at 0930, and the wind was out of the east with low cloud cover. Caller mentioned properties owned by Southern Construction or Joplin Stone (ERLN). Caller said they have seen trucks from Hydro on Southern Construction property and has seen Denali trucks (I think they said at Joplin Stone property). Caller does not believe the smell to be coming from C&L Grease, due to the timing and wind direction during past odor issues. Caller asked about how to look up land application permits for properties and/or companies. I asked if I could have a Clean Water team member call them back.					
<b>Conclusions:</b>			SharePoint #12065 During the investigation I observed two exceedances of the 7:1 dilution-to-threshold standard with the nasal ranger. These exceedances occurred at least 15 minutes apart and within an hour. I used the nasal ranger off property and confirmed that there were no contributions of odor from potential upwind facilities. The facility is to mitigate their odors and send the department their plan by March 3, 2025.

<b>Concerned Party:</b>	Nicole Pennock, Jefferson County Stormwater							
<b>Concern Info:</b>	Nicole Pennock with Jefferson County Stormwater emailed the following about 3401 McMullin School Road in De Soto: "Yesterday, December 19, 2024, I conducted an inspection on the above-mentioned address after a call was received to Code Enforcement from a Jefferson County Deputy. Upon inspection, I noted a lot of trash and debris in the channel of a Stream Order 1 which feeds to a Stream Order 2 very nearby. We spoke with the homeowner, who did state her "dad" likes to burn his trash and will burn in or near the creek. Currently, we have the property owner on a Final Notice of Violation and stated all trash needs to be removed from the creek immediately and we will do a re-inspection next week. I wanted to make you aware of the violation and see if you like to have any involvement. I have attached photos for your reference."							
<b>Conclusions:</b>	A site visit was conducted. No evidence of open burning violations found. Jefferson County Public Works is making the property owner clean up all the trash in the creek.

<b>Concern Info:</b>	We received an anonymous odor concern from the DNR website. The CP states: Reporting for incident 12/18/24 at around 11:45pm, but have noticed the issue on and off for several months prior.							
	A harsh metallic/burning chemical smell is detectable in the air, so strong that it causes pain in nostrils/nasal cavity and back of throat/soft palate. It tends to pick up late at night like on the date/time reported.							
	Affected in the 2100 block of South Jefferson in St. Louis, MO (63104), but upon research, believe the concern to be related to hazardous waste burning at or around Veolia, more than 2 miles southeast in Sauget, IL ( <a href="https://www.epa.gov/caa-permitting/veolia-sauget-air-permitting">https://www.epa.gov/caa-permitting/veolia-sauget-air-permitting</a> )							
<b>Conclusions:</b>	A site visit was conducted and I noticed a slight, earthy unsustained odor, but no metallic/burning odor.

<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>				Recieved an anonymous open burning concern from the DNR website. The CP states"Residents of 3955 Illinois Ave, Saint Louis, MO 63118 have regular (most morning) burn pits behind building and in abandoned lot across the alleyway. Smoke and chemical smell fills the entire neighborhood. Fumes provoke headache."				
<b>Conclusions:</b>				I conducted an onsite inspection and there was an open burning occurring during the investigation. There were no obvious signs of illegal items being burnt. The lot was also vacant where the burning occurred. I beleive it was used for warmth and most likely scrap wood from the vacant lot was being burnt.

<b>Concern Info:</b>	Via Webform - Request for Assistance - Submitted at 11:42 a.m. Sunday, January 19, 2025: I need help finding someone who can enforce the no more than 5 minutes idling rule in KCMO. There is a semi-truck driver who keeps parking in front of an empty house and idling all day/night. They park somewhere on Elma street. CP also sent an email to APCP direct adding: . It does not appear to be a neighbor but rather someone who is staying inside of the truck and parking in front of a vacant home that is being renovated. I've tried reporting it before since I know in Missouri trucks like that should idle no more than 5 minutes in a 60-minute time frame and it's terrible for the air quality. We are in a residential neighborhood full of children, parks, schools etc. This semi continues to park near the intersection of Brooklyn and Elma Street. Do you have any advice on what to do?							
<b>Conclusions:</b>	This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program (KCAQ).							

KCAQ reported that they also received a concern from the same party on 01/20/2025 and had emailed her for more information about the truck. I advised the concerned party to continue working with KCAQ on this issue.

<b>Conclusions:</b>	At the site of the former Evergy Montrose power plant which has been torn down Evergy and subcontractor Kissick Construction are now hauling toxic waste Flyash and other chemicals mixed with it from the other power plants in Kansas City onto the site and have been since January of 2022. It has polluted the air and groundwater around the site and on neighboring properties. They haul the flyash onto the site inside of pneumatic bulk semi-trailers. Once it arrives on-site they hook the trailer up to a pipe that runs straight out to a ditch and has a water line that hooks up to the same pipe the trailer is attached to. It is supposed to be mixed with the already polluted lake water when they release the flyash to the site.							
<b>Conclusions:</b>	Department management is currently working on an action plan with more to come.

<b>Concern Info:</b>	Maysville							
<b>Conclusions:</b>				MFA went out of business but are cleaning out of the silos and flakes are floating in the air. They have been cleaning since last Thursday. Not sure how long they are going to be cleaning for. A huge fog blowing out of the machines. Concern party does not see any filtration system that is keeping the dust down. Have been cleaning the silos all day long. Called city hall to complain and they stopped over the weekend but has started again.				
<b>Conclusions:</b>				The facility recently sold and was in the process of emptying the silos. A vacuum augur was releasing particulate matter, but no fugitive emissions were observed crossing the property's boundaries. After a second concerned was received and further consultation with the facility, the vacuum was outfitted with a discharge pipe to redirect the emissions onto the ground. MFA at this time appears to have fixed the issue. The operation is expected to be complete by the end of next week (February 21, 2025), weather dependent.

<b>Concern Info:</b>				An anonymous caller was concerned that planes have been releasing chemicals into the air. She stated that she thinks these chemicals are Barium and Aluminum and it is causing her health reactions (bloodshot eyes). She stated that the dumps are random and even occur at night. She has noted that these chemicals are also being released in other counties as well (Gasconade and St. Louis). She took a picture from 1/25 and sent it to me. I called her back and stated that MODNR does not have much ability to investigate mobile sources. I referred her to the EPA and FAA with their phone numbers, but she would still like a call back from the Air Unit Supervisor explaining more.				
<b>Conclusions:</b>			No site visit or investigation was conducted as the DNR does not have authority over emissions from mobile sources.

<b>Concerned Party:</b>	Larry Deutsch							
<b>Concern Info:</b>								Strong odor coming from Valicore Sustainable Waste Management Solutions(Valicore). Valicore receives trucks of waste water from various sources. They collect, process, and recycle various wastewater streams . At the end the processed water is dumped into a sewer system generating very strong odor. The MSD sent a crew. The crew noted a strong odor in the area and said although sewer system is PRIVATE, MSD's Department of Environmental Compliance will investigate the issue. The crew also confirmed the odor is not due to any type of natural gas. I asked the caller to contact MSD. The caller told me he tried to contact them and they are not responding. MSD's email sent to the caller was forwarded to me by the caller.
<b>Conclusions:</b>								A site visit was conducted on 1/27/25 around noon. I went to 5505 Natural Bridge in St. Louis, I did not smell any bad odor and drove about half a mile in each direction, I did not notice any bad odor.

60531	1/14/2025	1/14/2025	Jeffery Mullins	Open Burning Used Oil	/Franklin	SLRO	CW	
<b>Concerned Party:</b>	Sergio Sainz-Mireles							
<b>Concern Info:</b>	We received an open burning and haz waste concern from the DNR website. The CP states "There is a chop shop that has been operating on lot / parcel 41 on Ranchers Rd in rural Franklin County, New Haven Missouri. Law enforcement has been unable to stop the activity and it has been going on for some time. I only noticed it when I moved out here a year ago. I reported the activity to the local Home Owners Association and they ignored my letters.							
	Usually the vehicles are dismantled in the middle of the night and they dump all the oil and fluids that were in the vehicles into the ground and it seeps right into the ground water. They also burn plastics and other banned substances to destroy any evidence that is left over.							
	We have had problems with the owner of the property since they also let squatters stay on their property and the property in front of their house, which does not belong to them (Lot 25 and 26 on Dogwood Trail). They also dismantle vehicles and burn plastics on that side of the street ( Dogwood Trail). They squatters do not have access to toilet facilities and relieve themselves wherever they can. The properties are also littered with disabled vehicles. Some of the vehicles may work, but have not moved in a long time.							
	The main concern is the dumping of hazardous chemical and the burning of banned substances."							
<b>Conclusions:</b>	No concrete evidence of prohibited open burning found. Letter provided to RP to inform them of our investigation and inform them of what is considered prohibited open burning activities.

<b>Concern Info:</b>	The city of St Joseph intends to move a trash mountain that is well known to have decades of asbestos underneath of it. In order to keep down the dust the plan is to water it down. This creates a new problem called Leachate. If they spray water, it will turn to muddy water. All of the bacteria & chemicals will now be in the form of water leaking down into the groundwater. The only way to protect from Leachate leaking into the soil & ground water is if several special liners are in place. These liners only exist at the bottom of the Cells that were approved by DNR. Trash Mountain has many sides that are hills. There is no way to contain the Leachate to a particular cell.							
<b>Conclusions:</b>	It appears no asbestos was disturbed at the time of the investigation.

<b>Concern Info:</b>	I have submitted several complaints up to this point regarding C&L Waste down the street from where I live. The smell continues to be so bad. I was recently told they are dumping Fri-Sun when they know DNR staff are likely not working and not going to investigate. So I started noticing it, and sure enough, it is Friday at 3:30 and the smell just came in terribly. I have been told in the past when I've submitted complaints that this company is within their legal rights, but they continue to make being outside unbearable at sporadic times. It is impossible to plan anything outdoors. It smells like feces outside my front door, and taking a walk in this brisk weather is not possible, let alone just walking to my mailbox and back without gagging. They may be dumping food waste at some points, but this smell today does not smell like food. It smells like human waste. This company should have never been permitted to do what they are doing. Please reopen this case and discontinue their license to operate as soon as possible so my family and all of our neighborhood can enjoy being outside of our homes.							
<b>Conclusions:</b>	SharePoint #12363 I did not observe any violations during this investigation. No action is required.

<b>Concerned Party:</b>	Denver Sullen							
<b>Concern Info:</b>	CP called and stated that the apartment complex being built at the junction of Jungs Station Rd, and Kings Xing road regarding the track out and mud being carried out on Jungs station rd, from the operations and construction. CP stated that mud and dirt are leaving the property, and causing hazards. The CP is also concerned about dust getting kicked up when conditions dry and dust on the road going across the road and neighborhood.							
<b>Conclusions:</b>	2.4.2025--JDS---Facility is responding to concerns we receive regarding trackout by increasing frequency of street sweeping and installing additional best management practices.

<b>Concern Info:</b>	I received a call about Central Stone Quarry at 5200 Hillsboro House Springs Rd in House Springs. The concerned party stated that the quarry blasted stone right next to their property line, and dislodged a stake in their yard. Neighbors who are downstream of the facility, have noticed debris from the blasting operation building up in the stream that runs through the quarry. They have noticed this debris is building up and causing blockages.							
<b>Conclusions:</b>	A site inspection was conducted at the facility. No dust violations were found during the inspection. Blasting is regulated by the Land Reclamation Program.

<b>Concerned Party:</b>	Anonymous							
<b>Concern Info:</b>	Harvey Pallets equipment and trucks continually travel from the sawmill, up the road a few hundred yards to a discreet pull off. Waste wood and sawdust is hauled there, dumped and lit on fire. The fire burns for days. The smoke chokes out the surrounding areas with smoke and makes visibility difficult, as well as breathing. Tires, trash and other pollutants produced by the sawmill are also dumped burned at this location. The coordinates to the entrance of the burn site location are as follows (37.4121951, -91.0591135) once off the highway a short distance, the burning pile of trash, tires, and sawdust can be seen. Only one road exists in and out							
<b>Conclusions:</b>	At this time, no violations were observed at the Harvey Pallets location in Reynolds County. Open burning requirements were discussed.

60767	2/11/2025	2/25/2025	Missouri Eastern RR and Woody Bogler Trucking	Particulates	SLRO /Franklin	HH		
<b>Concerned Party:</b>	Jeff Taylor							
<b>Concern Info:</b>	We received a dust concern from the EPA (see attachment). The Cp alleges that the responsible party are downloading crushed coal from rail cars into tanker trucks, woody bogler is the trucking company that is hauling it, no sure who is doing the downloading from the rail cars to the trucks. When loading it dusts so bad that it blows over my house and covers my car and deck, sometimes it's not that bad but other times it's absolutely ridiculous, I have videos of the dust and it is all over the ground where they load and drive through it, it gets on the streets and goes everywhere when it rains. This is happening right in the middle of town by residents and restaurants, something should be done cause this can't be good to be breathing in especially on windy days. The site is right next to the train tracks on a gravel lot behind the restaurant Hages Nineteen. The supervisor of the job is Charles McBride, 614-441-2146. On 02/14/2025 I called Mr. Jeff Taylor and left message to inform him that I will be investigate his concern The following Monday were off and Tuesday was bad for travel due to inclement weather, Wednesday and Thursday I had fair career days at SLU and Harris-Stowe University. on 02/24/2025 I went to investigate the concern							
<b>Conclusions:</b>	A violation was recorded and a NOV will be issued to the facility.

<b>Concerned Party:</b>	Ryan Lesh							
<b>Concern Info:</b>	We received an open burning concern from Fire Marshall Ryan Lesh from the Saline Valley Fire Protection District via email. Fire Marshall Lesh states " I have another nuisance property that is conducting illegal burns. The address is 1044 Diehl Rd, Fenton, MO 63026. Would you like me to submit it through the DNR website? They have recently constructed a new home on the property and decided to burn all the construction debris at once. This pile was at least 100' x 50' at one point. As you can imagine, the burnt hot and quick. We originally got a call for a fire back on Feb 1st in the same area that was "vegetation" according to the report from the captain on the truck. The most recent event was on Feb 8th.							
<b>Conclusions:</b>	I went by the address today, Feb 10th and the items were still smoldering. While I drove by I noticed an approximately 500 gallon double walled fuel tank on site, not to far from the residence. It appears this is to refuel his heavy equipment. There are some other conex shipping containers as well. I did write a letter today, Feb 10th to notify him to cease all burning on the property due to creating a hazard. I have attached the two fire reports and my letter for your records."							
<b>Conclusions:</b>	There was no active open burning or any sign of smoke coming from the pile observed at the time of the visit.

60797	2/3/2025	2/14/2025	Kevin - Jenni Dicus	Other	Potosi /Washington	SERO	BG	Letter UF
<b>Concerned Party:</b>	Annie Dicus							
<b>Concern Info:</b>	CP States: lives at 10109 Woodchuck Road, Potosi MO 63664. Neighboring Landlord has 9 rentals on Woodchuck Road. He took dumpsters away and told his tenants to burn their trash. Neighbors are constantly burning trash containing what appears to be aerosol cans (exploding while trash is burning), rubber, plastic, possibly insulation, tarps and boxes. Has photos of some the items burning. CP also mentioned they are burning over on Knob Road as well. The constant smoke is causing breathing problems for the CP and family.							
<b>Conclusions:</b>	See UF dated: 03/07/2025 issued to Kevin Dicus

<b>Concern Info:</b>	Email states, "Caller concerned about chemical odors in his community and around his house. Describes the smell as a pungent garlicky odor and that he alleges it may arsenic. The odor is occurring on the north side of the town and is not constant but situational. He observed the odors occurring with the activity of the train track to the south. Caller also reported dumping between 1:00-3:00 am that may coincide with the odors. He is additionally concerned by the sewer infrastructure and an odor like methane gas from recent work on the sewer near his house and reports an illegal septic system 200 yards to the south of his property. The odor has been occurring for two years since November of 2022."							
<b>Conclusions:</b>	No violations were observed at the time of the investigation.
